

Transformation Through Sustainability

SARVAM **Enviro Solutions Pvt. Ltd.**

A professional environmental consultancy delivering sustainable, research-based solutions to industries. We specialize in wastewater management, environmental compliance, and testing of water, soil, and air, along with ESG and sustainability services.

We provide end-to-end, one-stop solutions to help organizations achieve compliance and move towards a greener future.

SARVAM
Enviro Solutions Pvt. Ltd.

VISION

To be a trusted leader in environmental and sustainability solutions, driving industries towards a cleaner, greener and more responsible future.

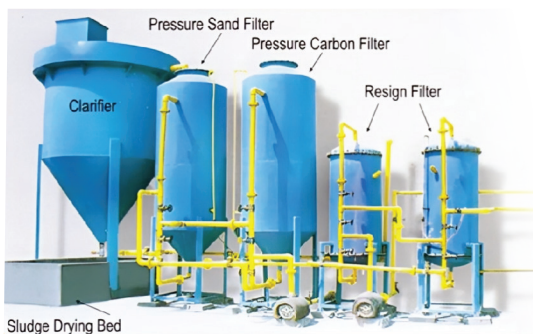

MISSION

To deliver innovative, research - driven and sustainable environmental solutions that help organizations achieve regulatory compliance, optimize resource management and enhance their ESG performance through end - to - end one- stop services

OUR EXPERTISE

Wastewater Management

We design efficient treatment systems tailored to industrial needs. Our solutions promote water recycling and reuse.

1. Effluent Treatment Plant (ETP)

Our ETP's are designed to treat industrial effluent effectively, ensuring discharge meets regulatory norms. Through physical, chemical, and biological processes, we help industries minimize pollution and recover reusable water — protecting both the environment and your reputation.

2. Sewage Treatment Plant (STP)

Our STP's treat and recycle municipal or domestic sewage using advanced biological and membrane technologies. The result — clean, reusable water that supports green infrastructure and reduces dependency on freshwater sources.

3. Zero Liquid Discharge (ZLD)

Our ZLD systems ensure complete elimination of liquid waste through evaporation, crystallization, and recovery processes. Every drop is treated, recycled, and reused — enabling industries to achieve sustainability and regulatory excellence.

4. Demineralization Plant (DM)

We specialize in producing high-purity water by removing dissolved salts and minerals using ion exchange technology. Ideal for power plants, pharmaceuticals, and manufacturing units, our DM systems guarantee consistent water quality and operational reliability.

5. Rainwater Harvesting (RWH)

We design efficient rainwater collection and filtration systems that store and reuse water for industrial, commercial, and residential applications. A simple yet powerful step toward water conservation and groundwater recharge.

Compliance & Approvals

Environmental regulations can be challenging to navigate. We offer comprehensive support to ensure seamless compliance with all MPCB requirements.

- Consent to Establish
- Consent to Operate
- Consent to Renewal
- E- water Return
- Battery Return
- Extended Producer Responsibility (EPR)
- All Environmental Authorizations

ESG & Sustainability Services

Assessment

- Life Cycle Assessment (LCA)
- Product Carbon Footprint (PCF)
- Greenhouse Gas (GHG) Accounting (Scope 1, 2, 3)
- Environmental Product Declarations (EPD's)
- Supplier ESG & Value Chain Assessments
- Water Audit

Reporting & Strategy

- ESG Gap Analysis
- Reporting (BRSR, GRI, CBAM, SBTi)
- Supplier Performance Tracking
- ESG & Net-Zero Strategy Development
- Science-Based Targets (SBTi) Selling
- Double Materiality Assessment

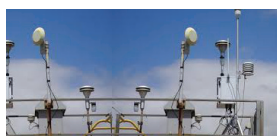

Turn Sustainability into Revenue

- Carbon Project Development
- Circular Economy & Environmental Compliance
- Carbon Credit Management & Monetization
- Renewable Energy Certificate (IREC) Service

Environmental Monitoring Services

Water & Wastewater Testing

Air Pollution Monitoring

Noise Level Monitoring

Soil Testing

Industrial Chemicals & Equipment Trading

We provide high-quality, chemicals and equipment to support industrial and environmental excellence.

- RO & Softener Chemicals for water treatment systems
- ETP & STP Chemicals and Microbial Cultures
- Boiler Water Treatment Chemicals
- Laboratory Equipment
- Industrial Safety Products & PPE
- CEMS (Continuous Emission Monitoring Systems)
- Environmental Display Boards

INDUSTRIES WE SERVE

We provide tailored solutions across diverse sectors to manage waste, emissions, and compliance effectively.

Manufacturing

Construction

Pharmaceutical

Food & Beverage

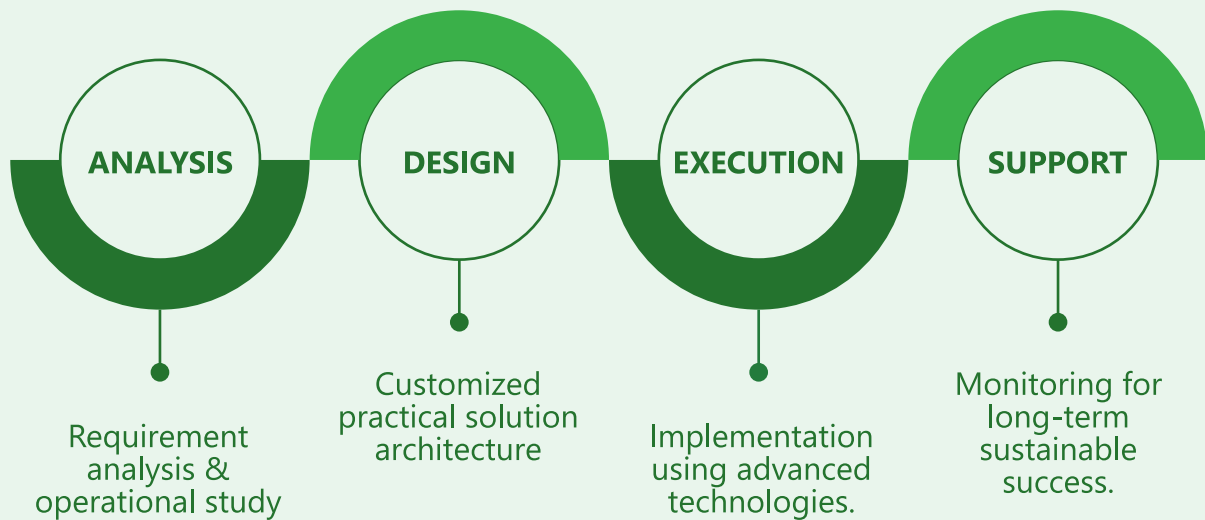

Automotive

Agriculture
